This guide explains the four Ontario retail sales tax rates and explains how they are calculated.

TAX RATE

The four tax rates apply as follows:

- transient accommodation: examples include accommodation in hotels, motels, hostels, tourist homes, camps, clubs, etc., for a period less than one month
 - American plan or other arrangements where meals and accommodation for a period of less than one month are provided for one price. The 5% rate applies to the total charge.
- 7% all taxable goods other than liquor, beer or wine
 - prepared food products such as sandwiches and meals for a total charge that exceeds \$4.00
 - telecommunication services: examples are telephone services, telegraph services, cable TV, pay TV
 - labour to install, assemble, dismantle, adjust, repair or maintain goods that are taxable
- 10% alcoholic beverages sold through licensed establishments
 - price of admission over \$4.00 per person to a place of amusement such as movie theatre, concert or amusement park
- 12% liquor, beer or wine sold through retail stores (included in purchase price)

TAX CALCULATIONS — ROUNDING

Tax must be calculated to the nearest cent. Where the calculation results in a figure that is half of a cent or more, the tax must be **rounded up** to the next cent. Where the calculation results in a figure that is less than half of a cent, the tax must be **rounded down** to the next cent.

Examples:

Taxable amount	\$12.50
Tax at 7%	.8750
Rounded up to next cent	.88
2. Taxable amount	17.05
Tax at 7%	1.1935
Rounded down to next cent	1.19

For your convenience, a 7% retail sales tax schedule appears on the back of this guide. If you would like 7% tax schedule cards to keep at your cash register contact your local Retail Sales Tax Office. These cards are convenient for use by cashiers and sales clerks.
